### Overview

McGuyer Home Builders, Inc. (MHI) is a privately held Texas homebuilder. Consistently recognized as one of the nation's top homebuilders, MHI builds homes in Houston, Dallas-Fort Worth, Austin and San Antonio. MHI offers award-winning designs under its signature brands – Coventry Homes, Plantation Homes and Wilshire Homes. Since its founding in 1988, MHI has built more than 50,000 homes for Texas families.

### Challenge

MHI was looking for a cloud backup offering to safeguard against potential accidental data loss. MHI chose our Cloud-to-Cloud Backup solution for its point-in-time restore capability for Microsoft 365.

### Solution

MHI found the Cloud-to-Cloud Backup solution to be reliable and easy to use.

*“Our users now have access to point-in-time backups that can restore at the folder and item level. It is much better than the email recovery built into Microsoft 365.”*

-David O'Neal, Network Administrator, McGuyer Home Builders, Inc.

### Results

Through Carbonite, MHI is able to access secure cloud backup for Microsoft 365, SharePoint, OneDrive, and other leading business solutions on Amazon AWS regional data centers.

#### About Carbonite and Webroot

Carbonite and Webroot, OpenText companies, harness the cloud and artificial intelligence to provide comprehensive cyber resilience solutions for businesses, individuals, and managed service providers. Cyber resilience means being able to stay up and running, even in the face of cyberattacks and data loss. That's why we've combined forces to provide endpoint protection, network protection, security awareness training, and data backup and disaster recovery solutions, as well as threat intelligence services used by market leading technology providers worldwide. Leveraging the power of machine learning to protect millions of businesses and individuals, we secure the connected world. Carbonite and Webroot operate globally across North America, Europe, Australia, and Asia. Discover cyber resilience at [carbonite.com](http://carbonite.com) and [webroot.com](http://webroot.com).
